Research Update on Mutual Funds and Shareholder Sentiment

Investment Company Directors Conference
November 12, 2009
Amelia Island, FL

Brian Reid
Chief Economist
Overview

- Asset appreciation has lifted U.S.-registered investment company assets significantly.
- Fund inflows have generally been following standard patterns of a low-rate environment that is part of bull market in bonds and a recovering stock market. Outflows from money market funds have been large, whereas inflows to bond funds have been at record levels. Inflows to equity funds have been modest.
- Demand for actively managed domestic equity funds and broad-based domestic equity ETFs has waned.
- Investor sentiment and confidence has dropped considerably, particularly among investors who have a very low tolerance for risk.
Investment Company Assets

Billions of dollars, 1997–2009*

* Data for mutual funds and ETFs are for September 2009, closed-end funds for June 2009, and UITs for December 2008.

1 Mutual fund data exclude mutual funds that primarily invest in other mutual funds.

2 ETF data prior to 2001 were provided by Strategic Insight Simfund; ETF data include investment companies not registered under the Investment Company Act of 1940.

Flows to Taxable Retail Money Market Funds Related to Interest Rate Spread
(1989–2009*)

* Data are through September 2009.

1 Net new cash flow is a percent of previous month-end taxable retail money market fund assets and is shown as a six-month moving average.

2 The interest rate spread is the difference between the taxable retail money market fund yield and the average interest rate on money market deposit accounts.

Sources: Investment Company Institute, iMoneyNet, and Bank Rate Monitor.
Flows to Equity Funds Related to Global Stock Price Performance
(1990–2009*)

* Data are through September 2009.
1 The total return on equities is measured as the year-over-year change in the MSCI All Country World Total Return Stock Index.
2 Net new cash flow to equity funds is plotted as a six-month moving average.
Sources: Investment Company Institute and Morgan Stanley Capital International
Flows to Bond Funds Related to Bond Returns
(1990–2009*)

Net New Cash Flow to Bond Funds

Total Return on Bonds

* Data are through September 2009.

1 The total return on bonds is measured as the year-over-year change in the Citigroup Broad Investment Grade Bond Index.

2 Net new cash flow to bond funds is plotted as a three-month moving average of net new cash flow as a percentage of previous month-end assets. The data exclude flows to high-yield bond funds.
